RESUME

Junior Full-Stack Developer with experience in Java, JavaScript, React, SQL, NoSQL, and Git, specialized in creating efficient and scalable digital solutions. I currently work at Dígito Tecnologia located in Florianópolis - Santa Catarina, Brazil. I worked as a Freelance Developer at a startup, actively participating in the project lifecycle, from conception to delivery, applying best practices such as OOP, unit testing, version control, and Agile methodologies. I started my programming journey at the age of 16 and, since then, I have been dedicated to learning and applying new technologies to solve real problems.

EDUCATION

2021 - 2023 | TECHNICIAN IN SYSTEMS DEVELOPMENT

Sesi Senai

2024 - PRESENT | COMPUTER SCIENCE

Estácio

EXPERIENCES

2024 - 2025 - ALTYS SOFTWARE HOUSE - FREELANCE DEVELOPER

- Development of custom software solutions using technologies such as: Java, Spring Boot, Node, NextJS, NestJS, Git, MongoDB, MySQL, React. Collaboration with multidisciplinary teams to deliver projects on time. Implementation of good programming practices, such as unit testing and version control.

2025 - DÍGITRO TECNOLOGIA - INTER

- Development of a multithreaded system and contact center with React, JavaScript, and TypeScript, using Git for code versioning. Collaborating not only with code, but also with ideas for new applications in the system architecture.
